ESITO'S NEW CAREER INFORMATION DVD

ESITO is pleased to launch the new Career Information DVD which is

available free of charge. The Electricity Supply Industry offers a range of career activities including scholarships, free taster courses and Gateway, to encourage students into considering the electricity supply industry as a career choice.

The DVD contains the following segments and is 16.30 minutes long:

- Overview of the electricity supply industry – 2.56 minutes
- Business Administrator – 2.15 minutes
- Cable Jointer – 2.32 minutes
- Line Mechanic – 2.48 minutes
- Mechanical Fitter – 2.20 minutes
- Operator – 2.55 minutes
- ES Electrician – 2.56 minutes

Resources to use in conjunction with the DVD

Two resources have been developed that will help students to engage with, understand and provide a record of the information on the DVD. They can be used in classroom activities that will also assist with literacy.

A3 Mind Map

The mind map is a resource aimed at helping students capture the information they learn from the DVD and record it in an attractive visual format.

It comprises a diagram of the electricity supply industry from generation to final use. It also provides boxes to capture information about the six trades career pathways that are profiled in the DVD.

Career Pathway cards

The cards comprise six career pathways title cards each with a photo and six cards containing lists of job tasks that match the career pathways. The aim is to match the correct job task card to the title card.

The blank mind map, completed mind map (with answers), and the career pathway cards can all be downloaded from the ESITO website www.esito.org.nz/career_centre/career_advisors/

Possible Activities

Activity One – Electricity Supply Industry Overview

- Watch the overview segment of the DVD. Give students each a copy of the mind map.
- Students work in pairs to fill in blanks around the electricity supply industry diagram in the centre of mind map based on what they've heard and seen on the DVD. Key words on the mind map will help with this.
- Students give verbal feedback to the group showing and explaining what they currently know about the electricity supply industry.
- Teacher goes over the completed mind map with students.

Activity Two – Career Pathways

- Watch the six career pathways segments of the DVD.
- While watching students think about what ESI career pathways are of interest to them and why. Optional — students give verbal feedback on this.
- After watching the DVD students complete the card matching activity in pairs by matching the career pathway title card to the correct tasks card.
- Complete the rest of the front of the mind map template aiming for as complete a map as possible from what has been viewed and talked about.

Activity Three – What next?

- Students read the back of the mind map section 'About ESITO' that explains ESITO's careers activities.
- If available, the teacher could use a data show to show students the sections of the ESITO website that relate to these activities – www.esito.org.nz/career_centre/
- Students discuss in pairs anything further they would like to know about careers in the electricity supply industry and write this on the back of the mind map with ideas of how they might find this out.
