

Electricity Supply Line Mechanic

What Line Mechanics Do:

Line mechanics enjoy a wide variety of challenging and satisfying roles particularly for people who love to work outdoors. They provide an essential service to the community and the country by dealing with emergency repairs to electricity lines. They erect and replace power poles and pylons, splice electricity cables and test lines and circuits. They are also involved in administration, job planning and vegetation control. There is a steady demand in the electricity supply industry for qualified line mechanics and career opportunities abound for those looking for this type of employment.

▶ About ESITO

ESITO is the Electricity Supply Industry Training Organisation that

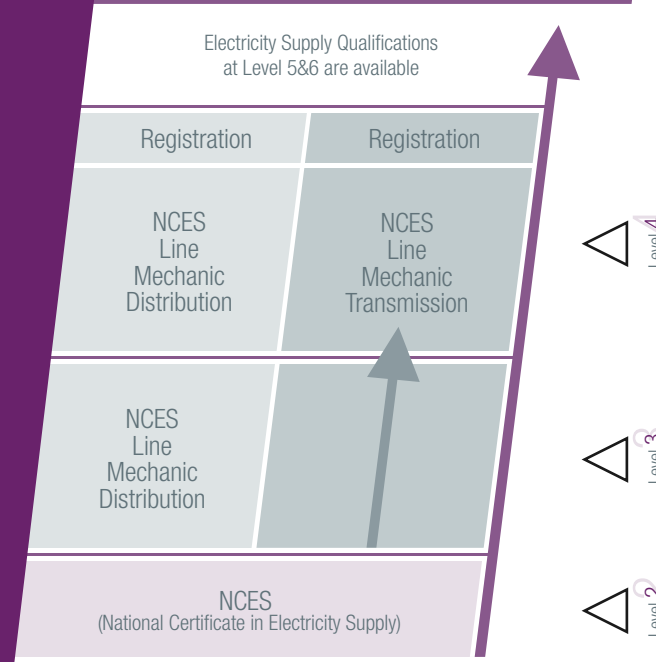

- sets standards and registers qualifications on the National Qualifications Framework that meet the needs of the industry;
- manages training arrangements that enable employees in the industry to achieve these standards and qualifications; and
- provides leadership to the industry on skill and training matters.

ESITO ensures that trainees get a lot of help to complete their qualifications. We work closely with trainees and their employers to make sure that they have mentors or coordinators who will help plan their progress.

ESITO can help you identify scholarship opportunities if you need financial support to advance your training and development. ESITO will work closely with your employer to plan your training and makes sure that the qualifications you get are recognised nationally and internationally.

Your Career Pathway To The Future

▶ Planning Your Career

The electricity supply industry has a lot of training and career choices. We'll help you plan your training to develop a rewarding and satisfying career that can take you anywhere - whether it's up the corporate ladder, out into the countryside, across the ditch or around the world.

It doesn't matter where you start off in this industry. You're not locked into your first choice. You can try new jobs and learn new skills all the time. While you're training, you're not only paid but you can look forward to well-paid jobs and packages in all sectors of the industry.

ESITO provides:

- well structured training programmes
- internationally recognized qualifications
- individual coaching and training support
- self-paced learning
- ability to check your own progress
- help with career planning and development
- modern apprenticeships support
