

Electricity Supply Mechanical Fitter

What Mechanical Fitters Do:

In the electricity supply industry, mechanical fitters work with important, often large pieces of mechanical equipment like turbines, boilers and generators to produce electricity required for consumers. You will work on the installation, maintenance and repair of this equipment. You can expect to be working in thermal and hydro power stations as well as with new technologies such as wind and geo-thermal sources of energy. Mechanical fitting qualifications include the specialised requirements for working in the electricity supply industry.

▶ About ESITO

ESITO is the Electricity Supply Industry Training Organisation that

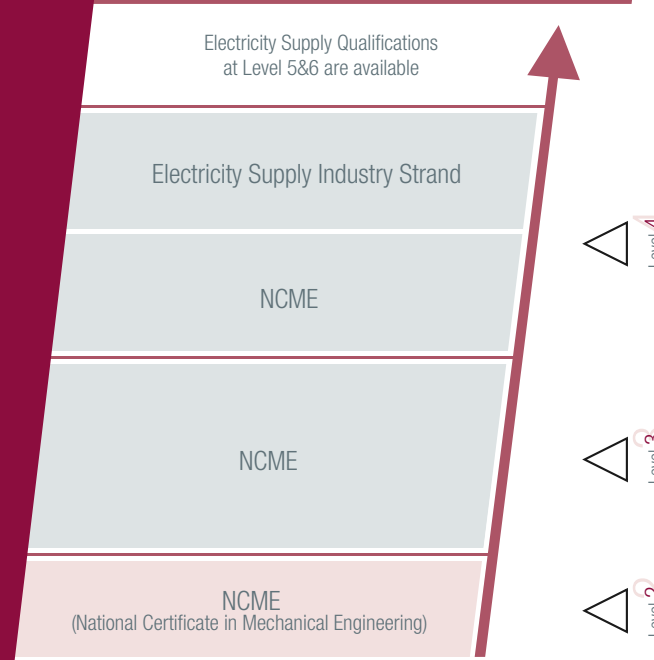

- sets standards and registers qualifications on the National Qualifications Framework that meet the needs of the industry;
- manages training arrangements that enable employees in the industry to achieve these standards and qualifications; and
- provides leadership to the industry on skill and training matters.

ESITO ensures that trainees get a lot of help to complete their qualifications. We work closely with trainees and their employers to make sure that they have mentors or coordinators who will help plan their progress.

ESITO can help you identify scholarship opportunities if you need financial support to advance your training and development. ESITO will work closely with your employer to plan your training and makes sure that the qualifications you get are recognised nationally and internationally.

Your Career Pathway To The Future

▶ Planning Your Career

The electricity supply industry has a lot of training and career choices. We'll help you plan your training to develop a rewarding and satisfying career that can take you anywhere - whether it's up the corporate ladder, out into the countryside, across the ditch or around the world.

It doesn't matter where you start off in this industry. You're not locked into your first choice. You can try new jobs and learn new skills all the time. While you're training, you're not only paid but you can look forward to well-paid jobs and packages in all sectors of the industry.

ESITO provides:

- well structured training programmes
- internationally recognized qualifications
- individual coaching and training support
- self-paced learning
- ability to check your own progress
- help with career planning and development
- modern apprenticeships support
